Why?

- Report 'Strengthening and mobilising ARRS roles to unlock capability and potential' (Jones 2022)
- Workforce Challenges
- Understand impact
- Measure impact
- Develop the evidence base

○

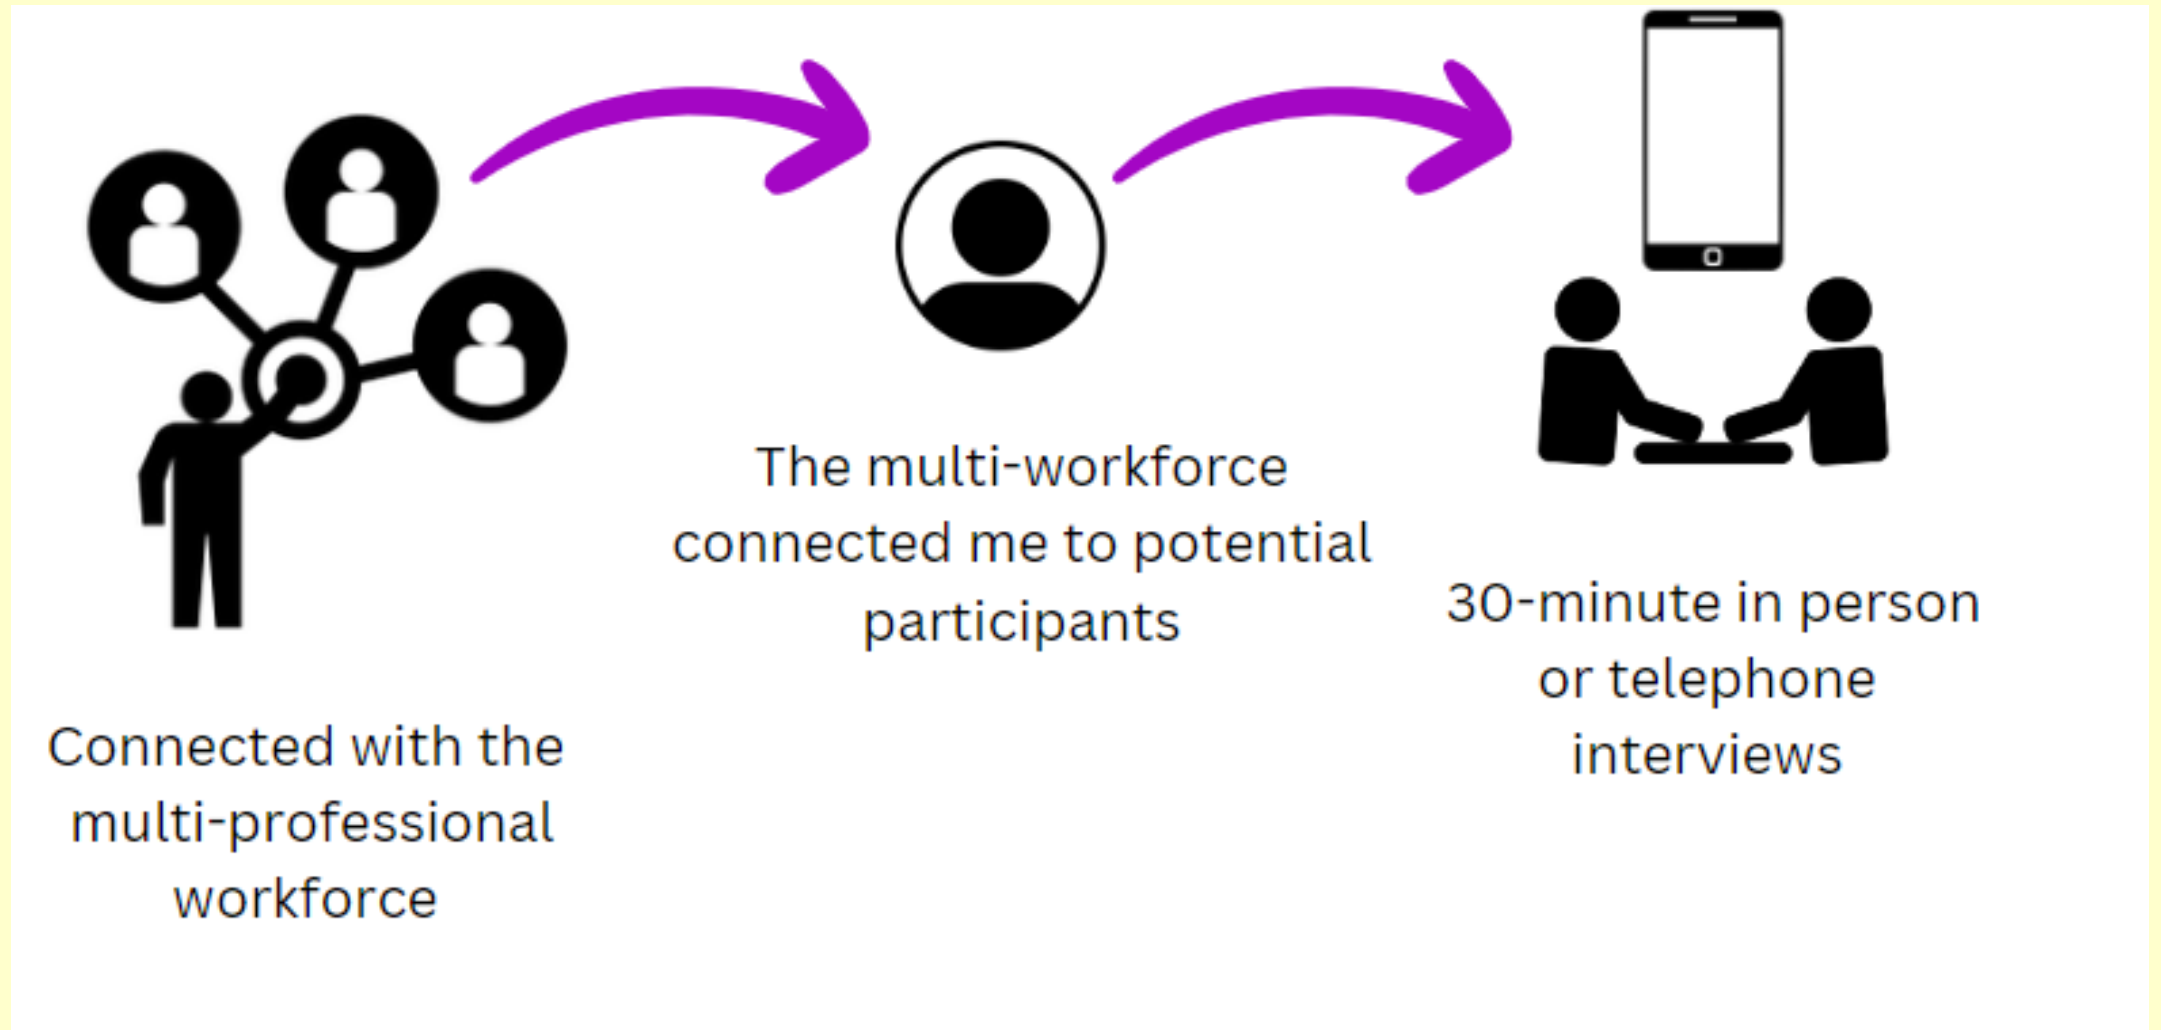

Aims and Objectives

Aim: To understand the impact of the multi-professional workforce in primary care.

Objectives:

1. Interview people with lived experience of the multi-professional workforce in primary care.
2. Identify the types of interventions being deployed.
3. Understand the impacts resulting from contact and intervention.

What and Where?

Who?

Nine roles included

- **Advanced Clinical Practitioner**
- **Care Coordinator**
- **Dietitian**
- **Health and Well-being Coach**
- **Mental Health Practitioner**
- **Occupational Therapist**
- **Paramedic**
- **Physician Associate**
- **Social Prescribing Link Worker**

Patient and Caregivers

17 Patients
3 Caregivers

♀ 10 Female 10 Male ♂

Sixteen patient participants ages ranged from 20-95

Populations we are working with...

- Complex and multiple health conditions
- Those who are socially isolation
- People living with trauma
- People living with addiction
- People living with learning difficulties
- People living with the impacts of neurodiversity
- People living with long-term health conditions
- Whole Families
- People experiencing health inequalities
- Young adults
- Refugees and asylum seekers
- Non-English speakers
- Housing issues
- People living with frailty

Six types of intervention being deployed

Occupation Focused

Graded approach
Activities of daily living
Employment

What we appreciate...

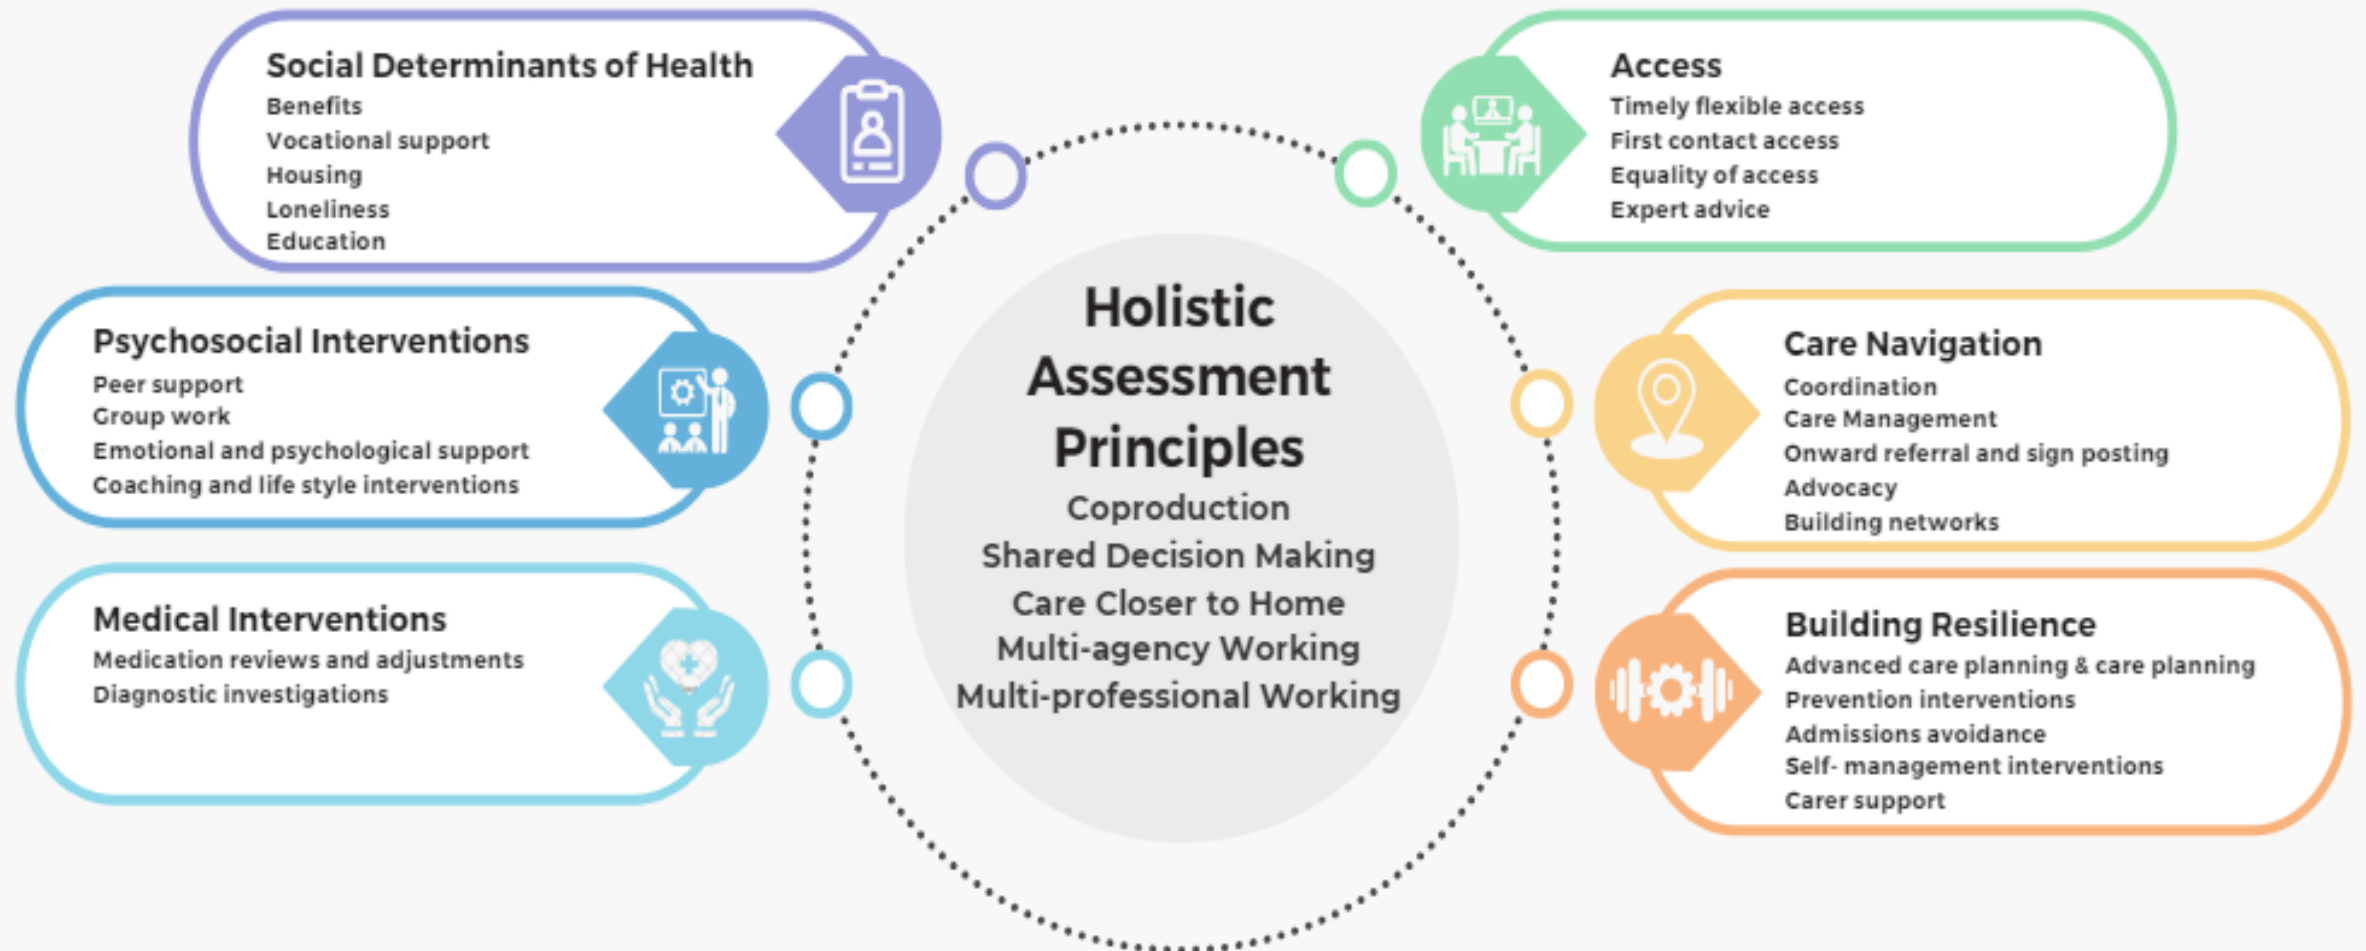

Multi-professional working and impacts

- Social determinants of health
- Psychosocial interventions
- Medical interventions
- Access
- Care navigation
- Building resilience

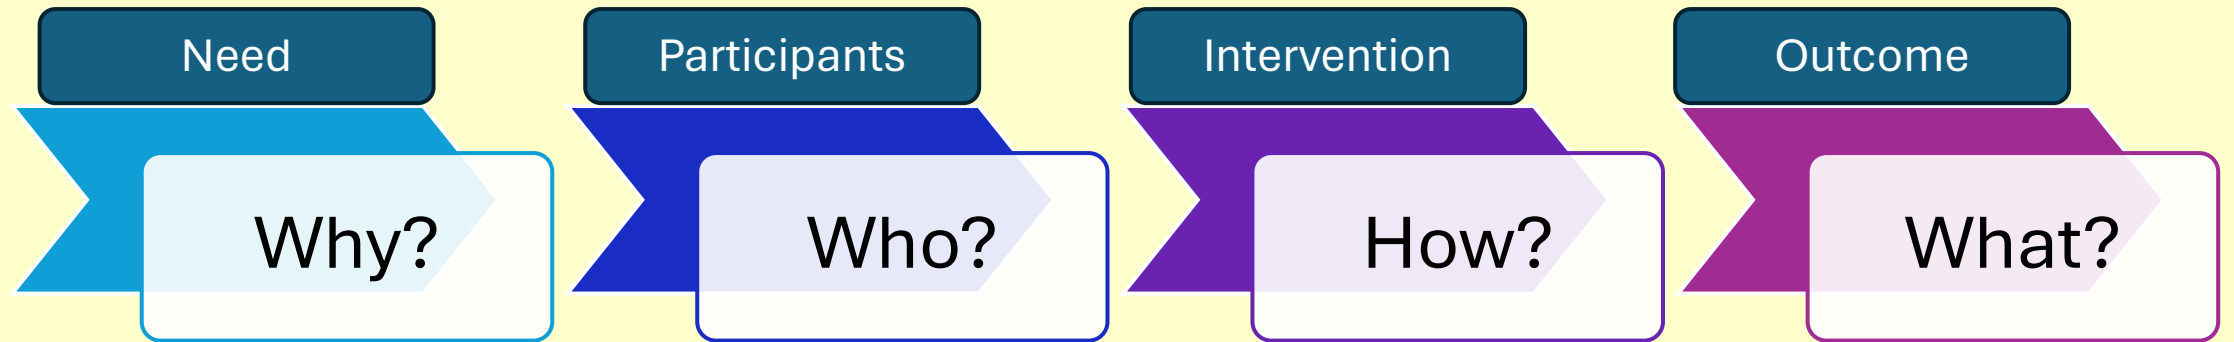

Multiple Professional Working in Primary Care

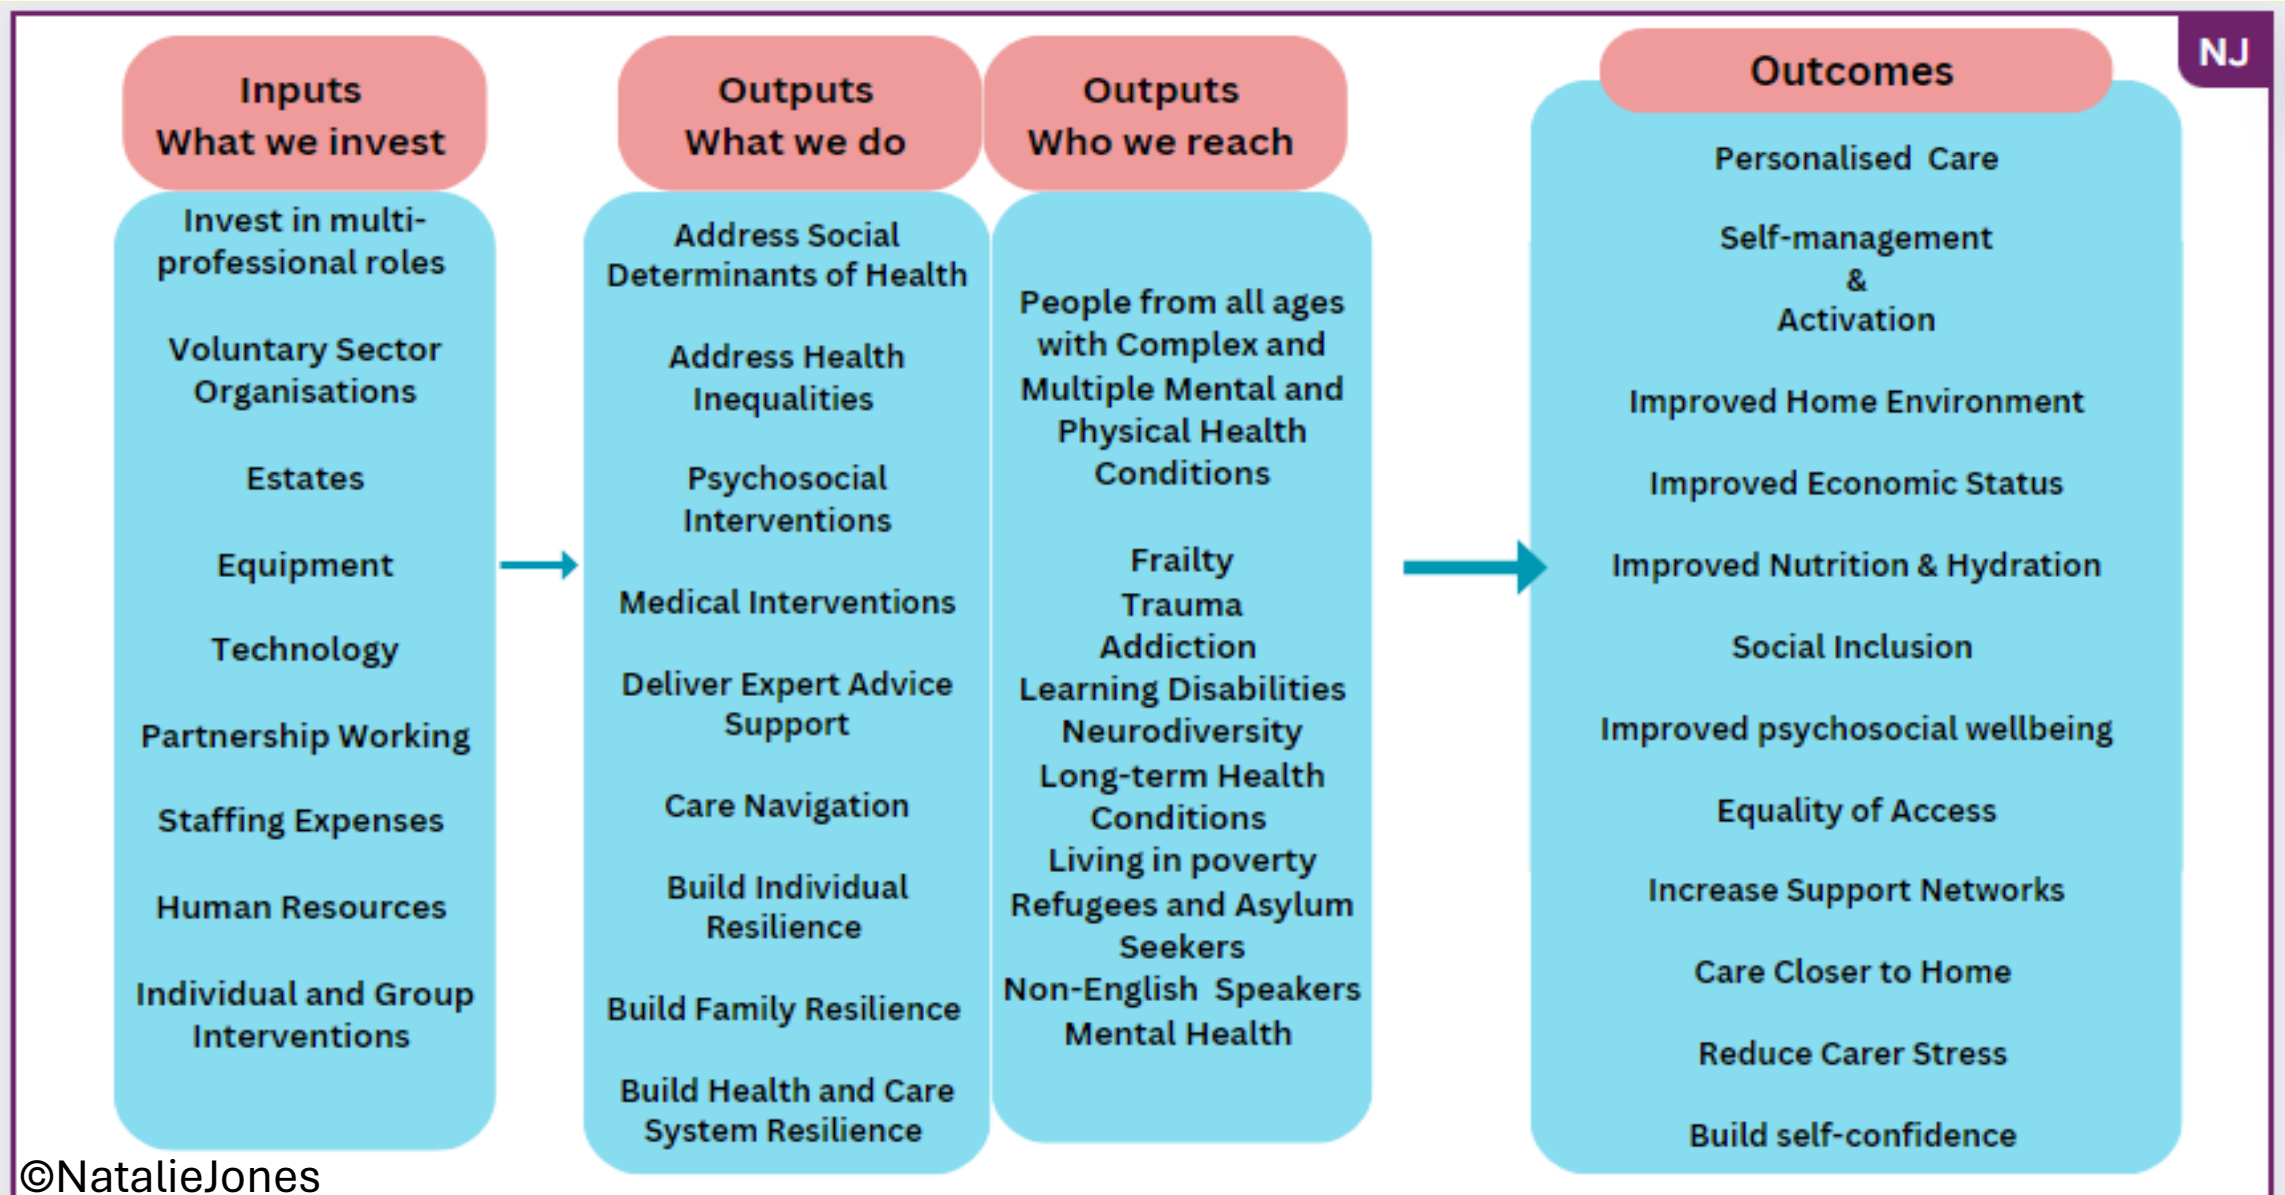

Six Domains of Impact

Theory of change

Multi-professional roles a theory of change...

Three take-away messages

- Lived experience data can provide rich examples of impact.
- We need to evaluate and research alongside service developments and innovation to capture the outcomes and understand the mechanisms of change.
- Although all the roles are unique, some common areas of impact exist.

Recommendations: Four Key actions

Increase awareness of multi-professional roles and their benefits

Provide clear definitions of the roles within the primary care team

Develop information and resources on these roles

Use the six domains of impact and the logic model to start exploring ways to measure change.

What's in this for me? Next session!

- 💡 Left shift
- Psychosocial models of care
- Population health approaches
- Help to build the evidence base
- Are you interested in working with me on the next stage?
- Be part of the story!
